## The Lower Extremity Functional Scale (LEFS)

Overview: The Lower Extremity Functional Scale (LEFS) can be used to evaluate the functional impairment of a patient with a disorder of one or both lower extremities. It can be used to monitor the patient over time and to evaluate the effectiveness of an intervention. The authors are from McMaster University in Hamilton, Ontario.

**Patient Instructions:** Today, do you or would you have any difficulty at all with these activities?

Please <u>circle</u> the correct response for each question	Unable to perform activity or extreme difficulty	Quite a bit of difficulty	Moderate difficulty	A little bit of difficulty	No difficulty
